

Subject: Important USPS Web Tools Registration Notice

Date: Monday, October 5, 2015 at 9:54:56 AM Eastern Daylight Time

From: registration@shippingapis.com

To: Lucien Liz-Lepiorz

***** Please DO NOT REPLY to this automated message. Contact information is provided below. *****

Thank you for registering for the U. S. Postal Service's Web Tools Application Programming Interfaces (APIs). You have successfully registered for the Web Tools User ID (Username) found below. If you are using third party software, refer to your software provider for further instructions to begin using Web Tools with your application. Keep this email for your records and proceed to the next steps to complete integration.

Your Username is 899CODEC5250

Your Password is 836TO52YS618

Your User ID is currently authorized to access the following groups of APIs in production:

- Price Calculators
- Package Tracking
- Service Standards and Commitments
- Address Information (see below for usage restrictions)

For additional API access not listed above, see instructions in step 2 below.

Next Steps:

I. Begin using USPS Web Tools

Shippers using a third party shipping software or shopping cart provider: Refer to your software provider for instructions to begin using USPS Web Tools. If your software prompts you for URLs to access the USPS APIs, please use the production URLs below.

Developers integrating Web Tools into a custom application:

The following are the production URLs you will use to access the Web Tools Servers:

- <http://production.shippingapis.com/ShippingAPI.dll>
- <https://secure.shippingapis.com/ShippingAPI.dll>

Step-by-Step Instructions for All USPS Web Tools (important information when getting started):

- <https://www.usps.com/business/web-tools-apis/general-api-developer-guide.pdf>

API User's Guides (API specific technical/integration information):

- <https://www.usps.com/business/web-tools-apis/technical-documentation.htm>

USPS Web Tools website: (contains all these resources and more):

- <https://www.usps.com/business/web-tools-apis/welcome.htm>

II. Request Additional API Permissions

Permissions for creating shipping labels and scheduling Package Pickups are added separately. To obtain these permissions contact our Internet Customer Care Center (uspstechnicalsupport@mailps.custhelp.com) and include "Web Tools API Access" in the subject line. An agent will be happy to assist you.

For Label API permission requests, indicate in the body of the email

- If you will be modifying the label image
- How you intend to pay for label postage as payment cannot currently be remitted directly to USPS through the API.

For more information on postage payment options, follow this link to usps.com:

<https://www.usps.com/business/postage-options.htm>

III. Troubleshoot/Additional Questions

1. Reference our FAQ document for common questions and concerns: <https://www.usps.com/business/web-tools-apis/welcome.htm>
2. Contact your third party software provider.
3. If still experiencing problems, our Internet Customer Care Center (uspstechnicalsupport@mailps.custhelp.com) will investigate only if provided with the following:
 - Copy of a sample XML request resulting in the issue or error, pasted into the body of the email
 - Complete description of exact issue you are experiencing
 - Name of API
 - Name of third party software provider

IMPORTANT NOTICE REGARDING ADDRESS VERIFICATION API The Address Validation APIs can be used in conjunction with USPS SHIPPING OR MAILING SERVICES ONLY. The Address API must only be used on an individual transactional basis, i.e. not batch processing or cleansing of a database, but as a customer enters the information into a form on a website. For more information on the address management products offered by USPS, please visit <https://www.usps.com/nationalpremieraccounts/manageprocessandaddress.htm>. Failure to comply with these terms and conditions can result in termination of USPS API access without prior notice.

IMPORTANT NOTICE REGARDING USER ID

The Web Tools User ID provided is for you and your company to use when requesting data via the Internet from the U.S. Postal Service API servers. This unique User ID cannot be shared with others outside your organization, nor is it to be packaged and distributed or sold to other individuals, businesses or e-commerce web site entities. As per the Terms and Conditions of Use Agreement you agreed to during the Web Tools registration process, you are responsible to maintain the confidentiality of your User ID as specified. You may not package any APIs with your User ID for resale or distribution to others. The U.S. Postal Service does not prohibit the reuse and/or distribution of the API documentation (User's Guide) with sample code in order to generate awareness, encourage use or provide ease-of-use to customers or affiliates.

Warning - If the U.S. Postal Service discovers use of the same User ID from more than one web site, all users will be subject to loss of access to the USPS production server and/or termination of the licenses granted under the Terms and Conditions of Use.

Thank you for helping the U.S. Postal Service provide new services to our shipping customers.

Sincerely,

The Web Tools Team
